(22)Date of filing:

27.05.1986

(72)Inventor: ONO MICHIHIRO

## (54) PREPARATION OF CLEAR EXTRACTION LIQUID OF TEA

## (57)Abstract:

PURPOSE: To prepare extracted tea liquid preservable over a long period without causing browning and clouding and capable of keeping the taste and flavor of the liquid, by contacting an extracted tea liquid with a specific silica gel.

CONSTITUTION: An extracted tea liquid is made to contact with 0.01W5w/v% silica gel selected from a silica hydrogel, silica xerogel or a silica gel having intermediate properties between silica hydrogel and silica xerogel and having a specific surface area of 100W1,000m2/g (by BET process), a pore volume of 0.3W2.0ml/g, an average pore diameter of 10W500Å and a water-content of ≤70% (wet basis) and the silica gel is separated from the mixture. As an alternative method, an extracted tea liquid is passed through a column packed with the above silica gel.

## **LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]
[Date of requesting appeal against examiner's decision of rejection]
[Date of extinction of right]
